

DPP-250 Blister Packing Machine(Suitable for Alu-PVC.Alu-Alu)

Applications:

Our DPP-250 Blister Packing Machine can be widely used as tablet packing ,capsule packing,and other solid object packing such as candy, etc.

Feature:

- ✓ 1.DPP-250 Blister Packing Machine follows ergonomic design principles and is in accordance to the GMP and CGMP structure standards.
- ✓ 2.If there is an operation problem, the machine will automatically stop and display what the problem is .
- ✓ 3.The main motors are equipped with a variable frequency speed controller.
- ✓ 4.Modular-type work stations make the adjustment of work station clear and easy.
- ✓ 5.A safety enclosure is provided to protect equipment and operators.
- ✓ 6.Independent moulds can be assembled and disassembled easily.

Options;

- 1. Detecting system
- 2. Photoelectric registration device
- 3. Chiller cooling system

Machine Tech Data

Output :	Maximum : Alu-PVC 50times/min Maximum : Alu-Alu 30times/min
Maximum forming area;	245 x 130 x 15mm
Adjustable range of stroke:	30 - 130mm
Packing Materials	PVC:260x0.25(0.15-0.5)mm PTP:260x0.02mm
Air compressor:	≥0.22m ³ /min (self -prepared)
Power:	5.7Kw, AC 380V (or 220V) (Choose by client)
Rated frequency:	50Hz/60Hz
Air pressure:	0.5-0.7Mpa
Dimensions:	4200mm×650mm×1700mm(LxWxH)
Weight:	2000kg
