

## DHP-250P/350P Blister Packing Machine( Suitable for Alu-PVC.Alu-Alu)

### Applications:

The machine suitable for **ampoule, vials and pre-filled syringe etc . blister packing** , adopts automatic feeding system. Machine feeder can be connect with labeling machine ,and output can use with cartoning machine, thus formed a complete automatic packaging production line.

### Feature:

- 1.Machine with GMP standard,adopts PLC control system.
- 2.Uses the servo motor -driven and the main motor is adopts frequency con
- 3.Specially automatic servo drive feeder for ampoule,vial,pre-filled
- 4.Equipped blister forming detection ,feeding detect rejection
- 5.Uses the safety cover protection devices to ensure operator safety.

### Main Technical data:

Maximum blanking frequency	25times/minute
Maximum Working capacity	DHP-250P:100 blisters/min DHP-350P:150 blisters/min
Stroke	≤130mm(according to customer's request)
Maximum forming area	DHP-250P:245×130x35mm DHP-350P:345x130x35mm
Packaging materials	DHP-250P: PVC:260×0.25(0.15-0.5)mm PTP:260×0.02mm DHP-350P: PVC:350×0.25(0.15-0.5)mm PTP:350×0.02mm
Power supply	380V or 220V
Total power	DHP-250P: 6Kw DHP-350P: 7Kw
Air flow	≥0.38m <sup>3</sup> /min
Dimension of machine(L×W×H)	4500×850×1700mm
Weight	DHP-250P: 2500kg DHP-350P: 3000kg
