# SL-120 Semi automatic labeling machine (for Square bottle)

The scope of application:

1. Square bottles, boxs, plate and flat bottle.
2. PET bottles,plastic bottles,glass bottles or metal bottles.
3. It's widely used in industries,such as cosmetics,beverage,food ,medical,etc, and has greatly improved the production efficiency

Product Characteristics:

1. wide application,adapted to 10-200mm dimension square and flat bottle labeling.
2. high accuracy,and the error of   label joining part is no more than 0.5mm
3. adopt extrusion device to feeding,just need to put work-pieces,the machine can automatically   finish labeling.
4. use chuck type to adjust,   different work-piece can cut over easily.
5. use the synchronous belt,the stability of the mechanism   is greatly   improved.
6. the desktop design, make the structure simple,figure small and function strong.
7. the anode corundume alloy shelf and the deluxe computer white electricity box make the figure beautiful and generous.
8. advanced magic eyes,make the sensitivity high for the object and label.

Technical parameters:

Model	SL-120
Output	20-45 pcs/min
Electric source voltage	AC220V/50Hz or 110V/1/60HZ
Power	150W
Label dimension	Length:15mm-100mm Width:15mm-150mm
Bottle dimension	Length:20mm-200mm,Width:20mm-150mm, Thickness:0.2mm-120mm
Label inner core dimension	Internal diameter:φ76mm, external diameter:φ340mm
External dimension	850×410×720
Net weight	50kg
