

HM-I Capsule Tablet Counting Machine

Description:

This machine is widely used in tablet, capsule and pill counting and filling.

This machine is applicable to trial manufacture or batch produce in small scale in lab, hospital, Home and science research department.

Features:

1. This machine adopts the electromagnetism shake, working is smooth and trusty, design is scientific, operation is easy.
2. Whole machine is made of stainless steel, meet the GMP standard.
3. This machine is a perfect machine to relate industry bottle packing, bag packing, and can packing, and so on.
4. The volume is small, weight is light, counting is accurate, at present, and it is the best semiautomatic counting and filling machine in China.

Technical Parameter:

Applied materials	Tablet, capsule and pill
Hole quantity of the plate	5-100 (optional)
Counting range	1-100pcs
The diameter of counting plate	400 mm
Capacity	10-20 bottle(bag or can)/min
Power supply	AC,220V/50HZ or customization
Power	370 W
Weight	57 kg
Overall size	520×520×700 mm
